FOR IMMEDIATE RELEASE

GROTH CORPORATION ANNOUNCES...
Achievement of Russian Technical Certification

Groth Corporation announces the achievement of EAC (Eurasian Attestation of Conformity), a Customs Union Certificate.

The EAC mark is the mark of certification for products which have passed the conformity assessment according to the Customs Union (CU) Technical Regulations (TR). CU TR certification and Declaration of Conformity is a replacement of the GOST-R Certification System. The EAC mark allows products to be placed on the market in the Customs Union territories of Russia, Kazakhstan and Belarus.

Groth Corporation Pressure/Vacuum Relief Valves, Pilot Operated Valves and Emergency Relief Valves are certified to the Customs Union Technical Regulation 032/2013 on the Safety of High Pressure Equipment. Additionally, Deflagration and Detonation Flame Arresters are certified to the Customs Union Technical Regulation 012/2011 on the Safety of Equipment in Hazardous Environments.

To view the new **GROTH Valve Official Certificate and Flame Arrester Official Certificate**, which certify the compliance with the requirements of the Customs Union, visit: www.grothcorp.com and click on the Literature tab, then Certifications.

Established in 1960, Groth Corporation is a global leader in manufacturing pressure/vacuum relief valves, deflagration and detonation flame arresters, blanket gas regulators, and other low pressure relief products. Groth pressure relief products have been protecting refineries, chemical processing plants, and facilities with atmospheric storage tanks for more than 50 years.
