FOR IMMEDIATE RELEASE

Liberty, Missouri – December 30, 2016

## GROTH CORPORATION INTRODUCES THE NEW MODEL 12-TH THIEF HATCH

Groth Corporation announces the new Model 12-TH Thief Hatch for use on steel or fiberglass (FRP) low pressure oil tanks utilizing the eight inch round API 12 bolting pattern.

Designed to protect low pressure oil storage tanks, with industry leading high flow rates, and precision tolerances to provide superior sealing performance. The leakage is less than 1 SCFH of air @ 90% of the set pressure, keeping your tanks in compliance with industry standards. We were able to accomplish a product design with both superior sealing performance and industry leading flow rates. We paid high attention to detail in the precision machining and manufacturing to accomplish these exact tolerances. The Groth Model 12-TH Thief Hatch is available in a wide range of pressure settings and vacuum settings. For additional information and technical details, please visit our website at [www.grothcorp.com](http://www.grothcorp.com).

About Groth Corporation:

Established in 1960, Groth Corporation is a global leader in manufacturing pressure/vacuum relief valves, deflagration and detonation flame arresters, blanket gas regulators, and other low pressure relief products. Groth pressure relief products have been protecting refineries, chemical processing plants, and facilities with atmospheric storage tanks for more than 50 years.
